# PITCHED BATTLE PROFILES

## FEBRUARY 2024

### PITCHED BATTLE PROFILES

On the following pages, you will find the Pitched Battle profiles for most of the units that can be used in games of Warhammer Age of Sigmar. The rules for using Pitched Battle profiles can be found in section 25.0 of the core rules.

The Pitched Battle profiles are organised first by Grand Alliance and then alphabetically by faction. There are four Grand Alliances: Order, Chaos, Death and Destruction. The Grand Alliance to which a unit belongs is determined by the first keyword listed on the keywords line on its warscroll. For example, the first keyword on the Vindictors warscroll is **ORDER**, so the Pitched Battle profile for a Vindictors unit can be found in the 'Order' section of this book and, as the unit belongs to the Stormcast Eternals faction, its entry is in the Stormcast Eternals table.

The profiles for endless spells that are not faction-specific appear in the 'Additional Pitched Battle Profiles' section at the end of this booklet.

### BATTLEFIELD ROLES

Battlefield roles are important because they often determine which units you can include in your army, depending upon the army selection rules in the battlepack you are using. To make it easier for you to pick which units you wish to include in your army, the entries within each Pitched Battle profiles table are grouped by battlefield role (see section 25.5 of the core rules for more information on battlefield roles).

The different battlefield roles are as follows:

**Artillery:** These are units that are capable of making powerful, long-range shooting attacks.

**Battleline:** These units form the core of their faction's armies.

**Behemoth:** Behemoths are extremely large and powerful units that have a dominating presence upon the battlefield.

**Leader:** As the name suggests, Leaders are units that can command their fellow warriors in battle.

### ALLIES TABLES

Below a faction's Pitched Battle profiles table, you will find a list of allies that can be taken in an army from that faction (core rules, 25.8 and 27.1). If an entry in an allies table is simply a faction name, it means that any unit from that faction can be taken as an allied unit in an army from the faction with which the allies table is associated.

Many allies tables also specify restrictions on which units from a listed faction can be taken as allies. Similarly, if you pick a subfaction for your army, this may prevent you from taking certain units as allies.

*When we republish a set of Pitched Battle profiles, the new version takes precedence over versions with an earlier publication date or no publication date.*
